**Drive paper workflow
into the digital domain.**

Bring paper documents into the digital world.

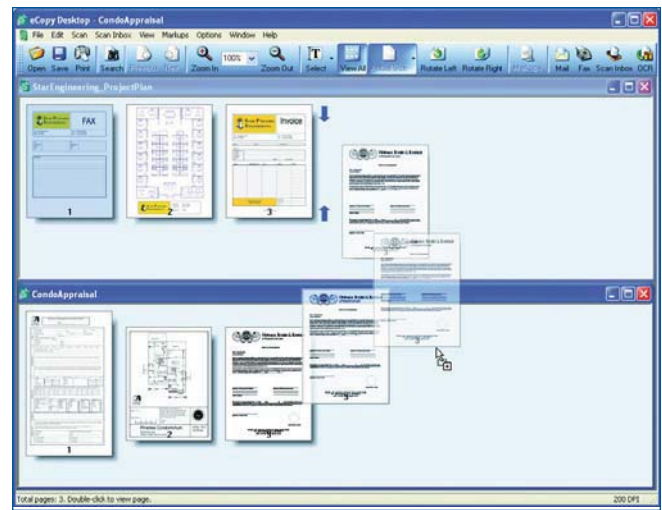

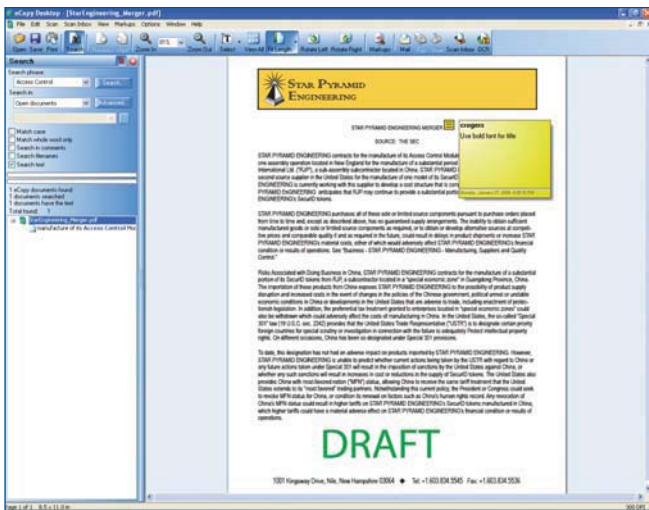

SAVIN® eCopy document imaging solutions easily and securely transform paper into business value using infrastructure that is readily available in any office — multifunction products (MFPs).

With an eCopy solution deployed, operational efficiency and business productivity improve dramatically. Energy expended in finding, copying, sorting, routing, filing and securing hardcopy documents can be put to better use.

Time wasted chasing paper becomes time invested in meaningful work that contributes to bottom-line profitability. The Savin eCopy solution has three levels of solutions ranging from eCopy PaperWorks™ software, to eCopy ShareScan® Essentials™, to the eCopy ShareScan® Suite™ for complete business process integration.

Whether you run a small business or belong to a large enterprise, eCopy solutions offer proven ways to maximize document efficiency.

eCopy PaperWorks enables office workers to work faster and more efficiently with scanned documents.

eCopy PaperWorks allows users to create documents from a variety of file types in a secure, common format.

Significantly Increase Productivity

With an intuitive interface that encourages user adoption and functionality as familiar as e-mail, eCopy brings paper and information technology together.

- Improve operational efficiency with a consistent, easy-to-use document imaging process based on a single platform.
- Unlock paper-based information so it can be included in business software systems.
- Consolidate paper and electronic processes into a single workflow.
- Stop spending time and money delivering hardcopy information.
- Ensure security, business continuity and compliance.
- Enable workgroup collaboration without paper-bound constraints of time or distance.

eCopy PaperWorks™: Scan, Merge, Modify and Connect Documents

eCopy PaperWorks is easy-to-use desktop document imaging software that enables office workers to convert electronic and paper documents into text-searchable, secure PDFs and directly include them in business applications and workflows used every day.

- Expand capabilities to create high-resolution, text-based PDFs.

- Automate merging of different document formats.
- Improve search capability.
- Utilize Bates/Endorsement stamps, watermarks and headers/footers.
- Create permanent individual annotations.
- Support for Citrix and Windows Terminal Services.
- Employ eCopy PaperWorks Connectors for EMC Documentum, Interwoven Worksite, Microsoft SharePoint and Open Text eDOCS DM.

eCopy ShareScan® Essentials™: Turn Networked MFPs Into Shared Document Capture Devices

eCopy ShareScan Essentials provides an easy-to-use interface that is embedded within the MFP and makes secure document imaging available to any user.

- Capture paper-based information and distribute directly from any MFP.
- Scan to network file folders, fax and eCopy PaperWorks.
- Connect to Microsoft Exchange/Outlook and IBM Lotus Notes e-mail.
- Integrate with business software. eCopy ShareScan Essentials is integration ready, enabling the use of paper document content in leading business applications just by adding the appropriate optional plug-in connector.

eCopy ShareScan® Suite™: Integrate Paper-Based Information Into Multiple Business Applications

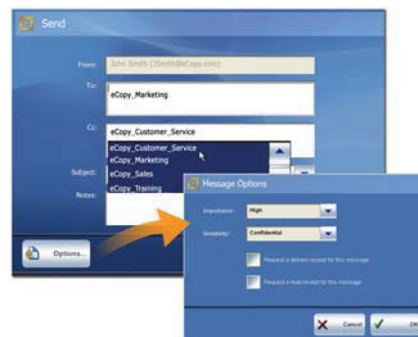

eCopy ShareScan Suite enables mid- to enterprise-size organizations to work securely and seamlessly with familiar business applications.

- Convert paper documents into electronic files for immediate distribution or storage.
- Integrate with any software, network repository, content management or document accounting system.
- Centralize IT administration and leverage investments in MFPs, scanners and software applications.
- Take advantage of the broadest and deepest compatibility with Microsoft technologies, including:
 - Microsoft Exchange/Outlook
 - Microsoft SharePoint
 - Microsoft Dynamics
 - Microsoft SQL and Access
 - Microsoft Management Console (MMC)
- Enjoy out-of-the-box connectivity to applications and seamless integration with custom workflows and databases through the versatility of eCopy Quick Connect™ scan-to buttons.
- Expand systems to meet customized or evolving needs.
- Benefit from an intuitive graphical user interface that delivers a consistent user experience across all MFPs.
 - User account-based security and access are dynamically updated from existing back-end systems.

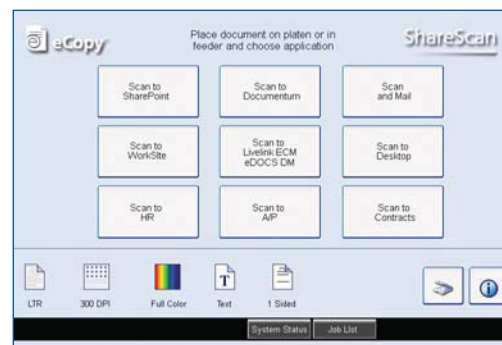

Solutions for the Individual, Workgroup and Enterprise

With eCopy, there is an effective document imaging solution for everyone, from individual users, to workgroups, to the enterprise.

- For personal document imaging, choose eCopy PaperWorks. For small businesses and workgroups, choose eCopy ShareScan Essentials. For robust enterprise capabilities, choose eCopy ShareScan Suite.
- The Savin eCopy solution is built for growth, enabling you to choose a starting point that best fits your business and add more features to what you already have.
- With eCopy's library of connectors, you can achieve native integration with the networked enterprise applications that are most important to you.
- Additional Business Automation Services allow users to accurately execute complex imaging processes when scanning files using a Savin MFP equipped with eCopy ShareScan.
- eCopy Barcode Recognition automates routine document scanning tasks such as naming, batching, splitting, filing and indexing scanned documents.
- eCopy Image Enhancement produces a “cleaner” scanned image.

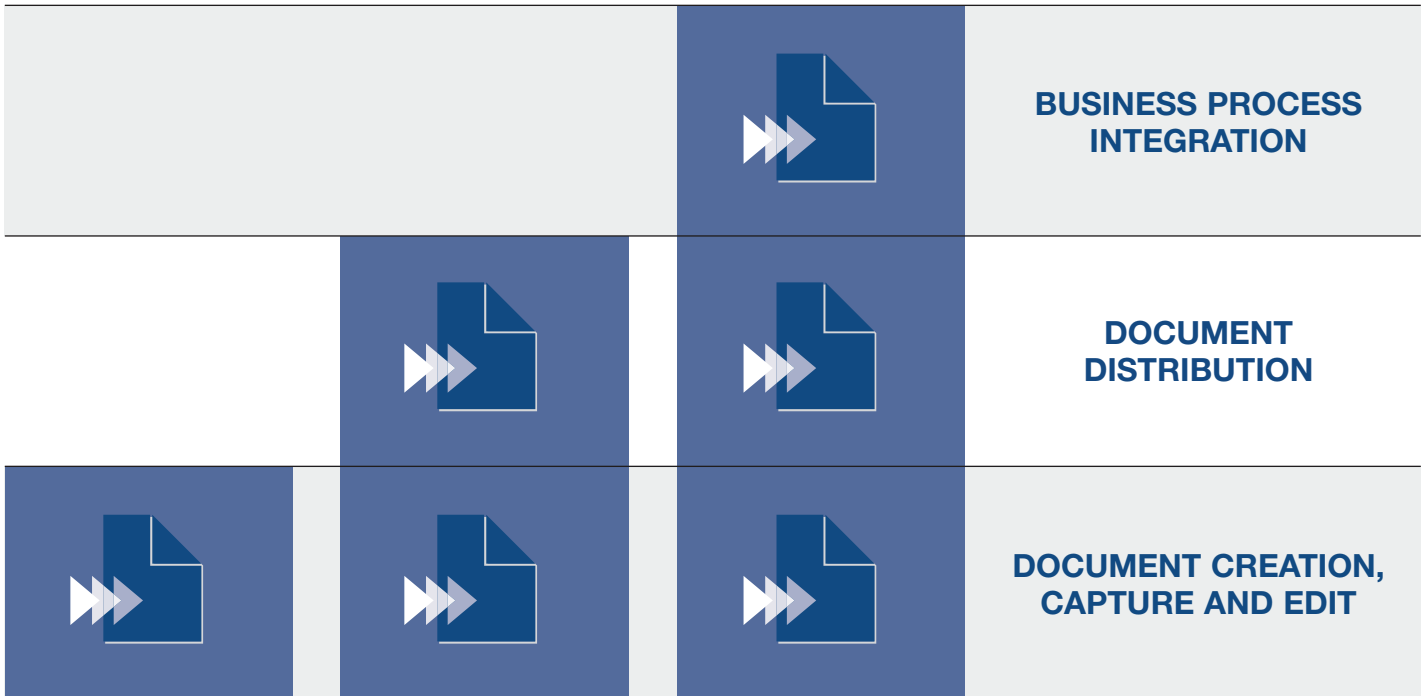

eCopy ShareScan Essentials connects MFPs to e-mail and other enterprise applications for easy-to-use, secure distribution of paper-based information.

eCopy ShareScan Suite features a familiar and intuitive user interface that helps users quickly send scanned documents to the proper destination.

eCopy ShareScan Suite is available in embedded or ScanStation configurations.

eCopy PaperWorks:
Personal Productivity

eCopy ShareScan Essentials:
Workgroups, Departments and Small Business

eCopy ShareScan Suite:
Enterprise Business
Process Efficiency

Savin eCopy document imaging solutions are designed as building blocks. The basic functionality for capturing, creating and editing documents extends across eCopy PaperWorks, eCopy ShareScan Essentials and eCopy ShareScan Suite. eCopy ShareScan Essentials adds versatile document distribution capabilities, while eCopy ShareScan Suite enables the integration of paper-based information into electronic business processes.

eCOPY PAPERWORKS

System Requirements Microsoft® Windows® XP (32 bit) with latest service pack, Windows Server® 2003/2008 (32 bit) with latest service pack, Windows Vista™ x86 (32 bit) Business and Enterprise Editions with latest service pack. Intel® Pentium®-based PC or equivalent is recommended; 800 MHz processors for Windows Vista; 300 MHz or higher processor for Windows XP or Windows Server 2003; 1 GHz for Windows Server 2008. 256 MB RAM or higher recommended for Windows XP; 512 MB RAM recommended for all other operating systems. 320 MB free hard disk space for the application files and working space during installation. Web connection required for automated activation and registration.

eCOPY SHARESCAN ESSENTIALS

Device Compatibility eCopy ShareScan Essentials is available on select MFPs with embedded platforms and includes server software that handles document processing and integration to back-end systems. For the latest supported platforms for eCopy ShareScan Essentials, please visit: www.savin.com/solutions

eCopy Embedded Server Requirements Windows Vista Business and Enterprise Edition Windows XP/2000/2003 512 MB memory recommended Intel Pentium PC (2.0 GHz)

eCopy Connectors and Services System requirements differ for each Connector and Service. Please find individual requirements on their respective datasheets.

eCOPY SHARESCAN SUITE

eCopy ShareScan Suite is available in two configurations:

eCopy ScanStation includes a freestanding touch screen and keyboard that connects easily to any scan-enabled MFP. The ScanStation includes all the hardware and software required to run eCopy ShareScan.

eCopy Embedded is a software client for MFPs with embedded platforms, enabling eCopy ShareScan to be accessed from the MFP's touch screen and server software.
